# **Identification and Inclusion of Related Shore-Based and Near Shore Activities into Maritime Safety Management System (MSMS) Code**

#### Dr. Barrie Lewarn

Faculty of Maritime Transport and Engineering Australian Maritime College

#### 1. Project Formulation

This project is formulated as part of a series of projects initiated by the International Association of Maritime Universities (IAMU) in that AMC is a member. The primary objective of this study is to identify all shore-based and near shore activities which are associated with maritime operation and to codify them into a Maritime Safety Management System. This is the attempt to extend the currently existing ISM Code in order to complete the safety net in the maritime industry for the sake of "safer shipping and cleaner oceans".

#### 2. Expected Outputs

Upon completion the project is expected to produce the following outputs:

- To identify all shore-based and near shore activities which are associated with maritime safety management system and their safety-related mutual relationships (Action Plan 1).
- To investigate the current practices of application of safety policy and management system associated with sea-based activities among typical samples of shore-based and near shore activities identified (Action Plan 2).
- To analyse the current gaps between sea-based and shore-based activities with regards to safety management policy and system, as well as common shortcomings/deviation in implementation of safety policy and system of connecting activities between sea and shore-based operations based on risk analysis (Action Plan 3).
- To formulate expected standard working procedures of activities in the light of international safety management benchmarked with ISO guidelines (Action Plan 4).
- To investigate the expected skills and qualifications of key positions in shore-based organisations in order to satisfy and facilitate expected working procedures of activities in Maritime Safety Management System (Action Plan 5).
- To propose curricula development of various courses about Maritime Safety Management System for key positions in shore-based organisation with expected skills and qualifications (Action Plan 6).

## 3. Project Framework and Methodologies

WHAT	HOW	WHO	WHEN
Action Plan 1	Literature review	<ul> <li>University professors</li> </ul>	December 2003
	• Experts system (Focus	<ul> <li>Maritime experts</li> </ul>	
	Group Interview &	• Executives in shipping-	
	Discussion)	related organisations	
Action Plan 2	<ul> <li>Questionnaire</li> </ul>	• Players identified in	April 2004
	• Interviews	Action Plan 1	
Action Plan 3	Literature review	<ul> <li>Internal project members</li> </ul>	September 2004
	<ul> <li>Benchmarking analysis</li> </ul>		
Action plan 4	Literature review	<ul> <li>Internal project members</li> </ul>	January 2005
	<ul> <li>Proposals developed from</li> </ul>		
	previous three Action Plans		
Action Plan 5	<ul> <li>Questionnaire</li> </ul>	<ul> <li>University professors</li> </ul>	June 2005
	<ul> <li>Interviews</li> </ul>	<ul> <li>Maritime experts</li> </ul>	
		• Executives in shipping-	
		related organisations	
Action Plan 6	<ul> <li>Benchmarking analysis</li> </ul>	<ul> <li>Internal project members</li> </ul>	December 2005
	<ul> <li>Proposals developed from</li> </ul>		
	Action Plan 5		

### 4. Checklist of processes and activities done

Up to the current moment the following processes and activities have been done in preparation for the **Action Plan 1** which will be due by December 2003:

Processes/Activities	Operation status		Result
Processes/Activities	In-progress	Done	Result
Preliminary literature review on maritime safety	1		
Composing the background of the project and mailing to potential participant of the Focus Group		<b>√</b>	
Contacting maritime experts in the industry to ask for their consent of participating into the Focus group discussion		√	Up to the moment there have been 10 experts agreed to join the Group. They are based in Australia and New Zealand with scope of work varying as port operator, port authority, pilot authority, channel authority
Establishing the group email addresses database as preparation for the discussion		<b>√</b>	The email address database for the Group has been established in the AMC's email system

Composing of a questionnaire for the Group discussion		<b>V</b>	The content and format of this questionnaire was reviewed and already finalised
Composing of the kick- off covering email	1		The content and format of this email is being reviewed and will be finalised soon
Emailing the kick-off covering email and the questionnaire to participants in the Group	٧		This activity will be done shortly
